Golf Opening Is A Decided Success

The gala opening of the Sugar City Golf Course for the 1934 season on Wednesday afternoon was an outstanding success in every way, and the Executive are to be complimented for the splendid way in which the afternoon's program was carried out.

Golfers were present from many outside points, especially Lethbridge, where a large contingent came from, and all of them expressed satisfaction and enthusiasm for the improved and enlarged course, and promised return visits.

The ladies served nearly 120 lunches during the afternoon, and everyone thoroughly enjoyed the refreshments, after their rounds of golf on the course.

One of the most successful features of the program was the fact that nearly every person who was at the course during the afternoon played golf. According to previous plans, members of the Club loaned their clubs and balls, and helped everyone who desired to start the game, so that with this co-operation those who did not play were few in number.

Mayor Meeks drove the first ball over the course for the 1934 season, and officials opened what promises to be the greatest season in golf that we have ever had. With Teddy Wastaf, professional, formerly of Waterton National Park in charge, and keeping the course up and running with the interest and membership continually growing, prospects are very bright for 1934 and we say success to the Sugar City Golf Club.

Quarterly Conference of the Taylor Stake will convene Saturday and Sunday next week, May 12 and 13, with a session Saturday evening, and three as usual on Sunday.

Conference is being held in the Alberta Stake this Saturday and Sunday, and it is expected that quite a number from here will be in attendance.

There have been a great many people about the town attacked with a mild case of flu recently, and most of them have been obliged to spend a day or two in bed.

It may be your turn this time FREE RADIO valued at \$139.50 Westinghouse 16 Tube set. Capitol Saturday night.

Mayor W. G. Meeks and L. L. Pack attended the Fish and Game Banquet in Lethbridge last Thursday night, and Mayor Meeks was made one of the directors of the organization.

Dr. Newlands, High School Inspector was here last week and went through the school, giving a satisfactory report regarding conditions there, with some suggestions for improvement in some things.

Everything is so busy these days that the streets are again a good share of the time, which is in striking contrast to the scene presented in the early spring and between seasons during the year.

Bishop M. E. Ririe, and Mrs. C. Jensen, both of Magrath, reported briefly in Priesthood Meeting Sunday on the recent Conference in Salt Lake City. Mrs. Jensen's remarks were particularly along the line of Relief Society work in which she is especially interested.

A large number of local fans attended the Boxing and Wrestling bouts in Lethbridge Monday and Tuesday evenings, and report some splendid contests. We have not the complete list but among the number were: The Meeks Brothers, A. W. Kirkham, Ira McBride, Frank Shaw, Wm. Wiggill, H. F. Allen, Lee and George Brewerton.

"Y" Circus Greatly Pleases Good Crowd

The Lethbridge "Y" Circus, and various other features staged in the Opera House last Friday night, under the auspices of the Lethbridge Rotary Club, was a big hand from the appreciation of the Lethbridge Rotary Club, was a big crowd at the conclusion of greatly enjoyed by all present each stunt.

When it was presented to a crowd of house, kiddies being in the majority, although there was a goodly number of adults present.

The group of athletes received a big hand when they all marched single file around the large floor, prior to starting the show and starting with this march and continuing till the last, the three clowns kept the crowd in gay spirits by their antics and acrobatic stunts.

These young people who have been trained in the "Y" Gym during the past winter in classes in charge of M. Samson physical instructor, certainly showed wonderful physical development, and in the drills and stunts they put on, they showed ability in hand springs, air springs, cart wheels, high dives, parallel bar work, formation in figures and silhouettes with the spotlight on them, ladder work, and various other features which demanded strong bodies, Friday night, under the auspices of the Lethbridge Rotary Club, was a big hand from the appreciation of the Lethbridge Rotary Club, was a big crowd at the conclusion of greatly enjoyed by all present each stunt.

WEEKLY LETTER

The use of strip farming in Alta. was tried by a few farmers in the Monarch - Nobleford district back in 1918 as a means of checking the soil drifting which had then become so serious that many farms were being abandoned. Today most of the farms in that locality are stripped and it is one of the most successfully farmed dry land areas in Western Canada.

The outstanding success achieved there will be of interest to dry land farmers in other areas where soil drifting has more recently become a problem and this week's letter gives a summary of the experiences of the Nobleford and Monarch farmers in overcoming their soil drifting problem. This summary was prepared by A. E. Palmer, Assistant in Field Husbandry at this Station, from material obtained at a meeting of farmers held at Nobleford last year.

All farmers present at this meeting agreed that strip farming is the best means yet devised for helping to control soil drifting where summer-fallowing is practiced, and the farmers are too dry to justify the sacrificing of moisture for a late-sown cover crop.

The strips used are from 10 to 20 rods wide and are spaced so that the farmers plowed strips are 20 rods wide, with one recommended strip wider than 20 rods.

Stripping alone is not enough while alternating their field in strips of crop and fallow has done more than anything else to control drifting, the farmers unanimously agreed that careful cultural practices must be followed to hold the soil, even with strip farming.

Most of the farmers favored the ploughless fallow, but a few advocated the use of the plow because ploughed fallow did not show enough trash or have drifted less than the ploughless fallow.

stubble or weeds has been left on the ploughless fallow. For this reason a stubble should never be burned before starting a ploughless fallow.

Moreover, the danger of the frequent cultivation of ploughless fallows was stressed, especially if the double disc or one-way disc is used, as the stubble is likely to be cut up and covered, so that it does not protect the soil from blowing. Some of the farmers considered it dangerous to use a one-way disc on a hinder stubble unit; the stubble was extremely heavy. If the land could be worked with the duckfoot cultivator and the rod weeder this was preferred. The one-way disc was favored for the first one or two operations on a heavy stubble such as is left by a header or combine as cultivators now in use may not work on heavy stubble. If it is possible to use a cultivator or rod weeder instead of the one-way disc for the second or subsequent strokes this was preferred as the rod weeder or cultivator leaves the stubble in a more satisfactory condition for holding the soil.

Emphasis was also laid on the necessity of restricting the number of cultivations to those actually needed to keep down weed growth. By carefully timing their cultivations to periods when they were most effective many of the farmers have kept their weeds in check with two cultivations on ploughless fallow some years, while some have required three cultivations. A number of the farmers are finding an April cultivation effective in eradicating winter annuals, such as stink weed.

A plan some farmers have found successful is to cultivate once in the spring and again in late summer or early fall. This late ploughing, Mr. Palmer explains, is resorted to in the case of ploughless fallows that do not show enough trash or have drifted less than the ploughless fallow.

SWEET CLOVER FOR MILCH COWS

(Experimental Farms Note)

Sweet clover hay has been used quite extensively for milch cows, dry cows, and growing stock at the Dominion Experimental Farm, Brandon, during the past four years. The hay used was cut with a binder when in the early blossom stage and cured in long stacks, when handled in this way, the hay proved palatable to the stock and was consumed readily when fed as the sole roughage and when fed with straw and silage. Sweet clover hay has three to four times as much protein and minerals as the grass hays and on this account is a superior feed and more adequately meets the needs of milch cows and growing animals.

A series of feeding tests have been conducted at Brandon to determine the effect on milk production and on the body weight of milch cows when sweet clover hay is used alone as a roughage as compared to a mixed ration of clover hay and silage. The results of these tests show little difference in amount of milk produced, or on the butter fat content of the milk produced by the cows fed the different rations. The main difference in effect of the two rations was on body weight of the cows. The cows fed sweet clover hay alone as roughage, lost in weight, while those receiving silage gained slightly in body weight, the difference being approximately one half pound daily per cow. The failure of the clover hay to maintain the body weight of the cows would in turn have affected the amount of milk produced, had the test been conducted over a longer period.

Allowing a single feed as the total roughage is not the best feeding practice, and the feeding of sweet clover hay alone is no exception to this rule. Sweet clover hay has, however, been found very satisfactory when fed with other roughages or silage for milch cows. The hay fed in these tests proved to be free from the defect responsible for the so-called "sweet clover sickness" and no difficulty was experienced in this regard. No objectionable flavour developed in the milk due to feeding sweet clover hay, even when this feed was used as the only roughage for the cows. Feed flavours as found in milk are frequently due to an abrupt change in feed, rather than to the feed itself, and are usually of short duration.

R. M. Hopper, Dominion Experimental Farm, Brandon, Man.

Contrary to what might be expected farming by the strip method adds very little if any to the cost of field work. There are some inconveniences to strip farming to be sure, but those who are practising it do not think them serious.

Raymond's Public Library is showing steady progress, and the report each month shows added books, both by donations, and also by purchase by the Board, and the interest continues to grow daily.

The new section of book case recently added is just about full now, and it will not be very long until more space will be required.

A new feature, introduced by the Board is the purchase very recently of eight up-to-the-minute volumes of fiction which will be rented to readers at twocents a day during the time they require to read them. This means that for a few cents each, readers may keep up with the latest fiction, reading many more late books than would otherwise be possible, and at the same time enable the Library Board to keep adding new books to their shelves, and paying for them by this small contribution of a few cents from each reader.

Following is a few facts Mrs. Ross, the Librarian has handed us, and which are worth looking at by citizens of the town, and should make them proud of Our Public Library:—

RECENTLY PUBLISHED FICTION WHICH HAVE BEEN PUT ON A RESERVE LIST FOR 2c. per DAY

Lloyd C. Douglas—"Forgive Us Our Trespases"

John Galsworthy—"Over the River"

Mazo de la Roche—"Master of Jhana"

E. Phillips Oppenheim—"Callows of Chance"

Margaret Ayer Barnes—"Within This Present"

Snicclair Lewis—"Work of Art"

Peter B. Kyre—"Capay Ricks Comes Back"

Alice Tisdale Hobart—"On For the Lamps of China"

The 1st Ward M. I. A. also donated their entire library consisting of 112 volumes.

Todate there have been 1890 books registered, 585 people own membership cards, 26 magazines are on the subscription list.

Ladies Literary Society; Dostoyevsky—"The Brothers Karamazov"; Flaubert—"Madame Bovary"

Mrs. Lena Wight; T. S. Arthur—"Ten Nights in a Barroom"; Procter—"Legends and Lyrics"; Southey—"Life of Nelson, R. S.—"Life of George Chapman"

T. T. Mendenhall; Feber—"Dawn O' Hara"

Mrs. Paul Schneider; Signkiericz—"Quo Vadis"

Mrs. Owen Lee; White—"Blazed Trail Stories"

General

Library Board; "Shorter Oxford Dictionary"—2 volumes

Harvey—"Oxford Companion to English Literature; Pickin—"More Power to You" (a new book by the author of "Life Begins at Forty"; The Libral Way" and "Canadian Problems" (Addresses delivered at the political summer school 1933)

Fleming—"Brazilian Wilderness"

Nordhoff and Hall—"Men Against the Sea"; Halliburton—"The Flying Carpet"; Yeats—"Collected Poems"; Kipling—"Second Jungle Book"

At the Municipal Council Meeting on Tuesday considerable of the time was occupied with a discussion of the real program for the coming year, and while no specific program was outlined, it was decided, if it could be arranged to have 30 per. of the costs of tax work out on the roads in the various districts. The routine business was transacted and the bills passed.

THE JEW COMES HOME

Modern science is working in Palestine a miracle even more amazing than those attributed to the Man of Galilee. Under the guidance of the road builder, the irrigation engineer, the agricultural expert, and the town planner, the land of the Children of Israel is rapidly being transformed from a sleepy, shabby back street on the eastern shore of the Mediterranean sea, into a hustling, thriving country that promises to exceed the glory of Palestine in the heyday of King Solomon.

In the reign of the wise king King Caravans of camels laden with spices, incense, and jewels and precious stones, passed through the Holy Land on their way to and from Egypt, Syria and the east. Today a steel pipe line 627 miles long carries crude oil from Iran across desert and mountain to tank steamers on the Mediterranean, and fast automobiles and motor buses and trucks carry passengers and freight between all the important cities and towns.

The river Jordan has been harnessed to develop electric energy; desert land has been re-

claimed by irrigation; new towns have sprung up all over the country; thousands of miles of motor highways have been built; huge six-wheel trucks pass along the road where the Good Samaritan performed his kindly deed—they are hauling potash and bromine from the manufacturing plant which extracts these products from the heavily impregnated water of the Dead Sea. And new settlers are using Missouri mules to plow up the plain below Nazareth where, according to Revelation, the final battle of Judgement Day is to be fought.

The Holy Land is humming with activity and the development has taken place since the Great War. Under the guardianship of Great Britain, Palestine has been made a national home for the Jews. Thousands of them are fleeing from persecution in European countries and seeking a haven of refuge in the land of their forefathers. Contrary to expressed opinion, these settlers from European ghettos have made successful farmers and are getting a living from the soil.

After hundreds of years of exile the Jew is returning home, and he is making it in a land of peace, industry and thriving prosperity such as it never knew before. — Bassano Mail

NEEDLES AND PINS

"The known is not always pleasing, but is less terrifying than the unknown". A needle broken off in the body causes fear that is almost terror in some cases because of the remarkable stories concerning the supposed wanderings of broken needles in the body.

The needle will move a little because it is usually partially or wholly embedded in muscle, and when the muscle contracts, the needle will move. There are only a very few authentic cases in which the broken needle has wandered for any considerable distance in the body. Most of the stories that are told about broken needles belong to the fairy tale book.

This type of accident results, usually, from the carelessness of the injured person, but sometimes it is another person who is careless. Needles should not be left lying around; there should be a definite place for them, and they should all be in that place excepting the needle that is in use. The needle which is out of its case should be kept threaded, as this makes it less likely to be lost.

It is surprising what part of the body may receive the jab from a lost or misplaced needle, and the needle sometimes breaks off. The person who walks barefooted or in his stocking feet around the house displays a confidence in the needle-using members of the family, which will be dispelled when his foot comes down on what was a lost needle, but which he has found.

The needle which is stuck in the arm of a chair or in the wall-paper, or which is left in the mending, does not always stay where it is put until it is wanted again. Hunting for the lost needle seems to be a favourite pastime with some women and an occasional diversion for most. This could be avoided if needles were always placed where they belong.

A needle will sometimes be left in a garment which is under going repairs, and in that event it may be broken off in the body of the person who puts on the garment. No matter how it happens, there is no cause for alarm, because there is little or no danger associated with the accident.

There are a few things not to do, and these include all efforts at squeezing and such procedures with the vain hope of getting the piece of needle out. This only makes matters worse. It is well to keep the finger or whatever part is injured at rest the less movement the better because all movement

KEEP Springtime Beauty ALL YEAR 'ROUND

with this marvelous
Olive Oil Face Powder

No one has to tell you what sun and wind will do to your face. A few days' exposure to the elements and you can feel your skin growing dry and rough. You can see it becoming old and shriveled.

But these conditions can be overcome easily by one simple precaution. The daily use of Outdoor Girl Face Powder will help your skin retain its youthful beauty and charm.

Outdoor Girl is new. Different. It's the only face powder made with an Olive Oil base. It soothes and softens the skin. Keeps the texture firm and supple. Outdoor Girl is light and fluffy, yet it clings longer than any other powder.

Outdoor Girl comes in 7 smart shades to blend naturally with any complexion. The Good Housekeeping "Seal of Approval" is your guarantee of quality.

Outdoor Girl Face Powder and other Olive Oil Beauty Products are sold by leading drug, department and chain stores in 3 sizes—1½, 2½ and 4½ oz. If you want to sample five of the most popular Outdoor Girl preparations, mail the coupon below.

What About Social Credit in Canada?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams, (W.) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J.). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

By following this series to the conclusion the reader will clearly understand the problem which faces Canada.

NUMBER 12

J. "Well, in 1928 I remember then there was quite a building boom going on, especially in office buildings and plant equipment and things like that."

W. "Yes, 'things like that.' Things that do not come on the consumer's market at all. Of course he has to pay for them in the price he pays for his consumable goods but at the time of all this construction work there is all this new money being paid to workmen, and it is not creating any more consumer's goods at the moment. As long as we keep on distributing money for making what we call 'capital equipment' that is, office buildings, roads, bridges, new factories, etc., we are supplying to some extent the deficiency in purchasing power which is the normal concomitant of our present system."

J. "But money distributed in this way stands as a debt against the community and it has to be paid some time."

W. "Bravo! You're beginning to see it! Of course, it's debt, and it is unrepayable debt, that keeps us bound hand and foot to the financial system?"

J. "Well, it's a mess alright. How are we going to get out of it? How are you going to make up this creeping error in our book-keeping system and make up the deficiency in purchasing power?"

W. "By a free gift of new purchasing power."

J. "But that will mean inflation!"

W. "It would, if prices were allowed to rise."

J. "Well, do you propose to fix prices? If you do, you've got a real job on your hands."

W. "No, there is no need to 'fix' prices. One of the Douglas features is a price control. The other feature of the plan is a National Dividend to every person in the country irrespective of age, sex, or employment."

J. "I thought you were going to say 'age, sex or religion.' But what do you mean, irrespective of employment?"

W. "Just what I said. The National Dividend would be paid to every citizen in the country, regardless of whether he was working or not."

J. "But that's not unemployment insurance!"

W. "Who said that it was? I said it was a National Dividend and you don't work for dividends do you? A shareholder who receives dividends is getting a return, not for work."

ing, but for investing, or for holding some share in a commercial undertaking. But I would prefer to leave this half of the plan until we have discussed the other part which, in Social Credit terminology is known as the Just Price. And before we take up either of these features I should like to find out if you agree with me in certain assumptions upon which Major Douglas works. We must be agreed on these things or it is useless to ask you to consider a system which is based upon them. Do you agree that a works system should have a definite objective?"

J. "Certainly; but what do you consider a proper objective?"

W. "To bring into existence the largest possible amount of consumable goods and to transfer them out of the industrial system in to the homes of private individuals as fast as they are made."

J. "Yes, that's all right but you say the goods are going to be distributed equitably. A little group get everything and the rest of the community suffer from want?"

W. "That makes no difference from the stand-point of economics. Of course we should be fools to allow such a condition to exist but the purposes of a productive system as such would be satisfied if it were producing all it could and the demand claimed the full production."

J. "But..."

W. "Wait a minute. That is not the situation today so you don't need to worry about it. The situation now with poverty (that is unsatisfied need for goods) existing side by side with Unemployment, (which is unused ability to make goods) is primarily a scientific problem and has nothing to do with morality. It is more suggestive of foolishness, or 'dumbness' than wickedness."

J. "Well, suppose I admit that the essential problem is to equate Consumption and Production?"

W. "If you do that, we can proceed. For by agreeing to this you automatically rule out the idea that the system exists chiefly to give employment to man, and that this is the be-all of his existence. You also exclude the idea that, while it may not be an end in itself, it is a very good way to control individuals and to make them conform to a fixed ideal, in other words, that it is a system of government."

J. "Well the way things are

Prohibition in the Home
(From an unknown but seemingly a authoritative source)

I had twelve bottles of whiskey in my cellar and my wife made me empty the contents of each and every bottle down the sink, so I proceeded to do as my wife desired and withdrew the cork from the first bottle, poured the contents down the sink with the exception of one glass, which I drank.

I then extracted the cork from the second bottle and did likewise, with the exception of one glass, which I drank.

I then withdrew the cork from the third bottle, emptied the good old booze down the sink, except a glass which I devoured.

I pulled the cork from the 3rd sink and poured the bottle down the glass when I drank some.

I pulled the bottle from the cork of the next and drank one sink out of it, and threw the rest down the glass.

I pulled the sink out of the next cork, and then poured the bottle down my neck.

I pulled the next bottle out of my throat and poured the sink down the bottle and drank the cork.

Well, I had them all emptied and I studied the house with one hand and counted the bottles which were twenty-four, so counted them again when they came around again and had seventy-four and as the houses came around I counted them, and finally I had all the houses and bottles counted and I proceeded to wash the bottles, but I couldn't get the brush in the bottles, so I turned them inside out and washed and wiped them all, and went upstairs and told my other half all about what I did, and Oh Boy, I've got the wifest little nice in the world.

ALBERTA NEWS BULLETIN

Issued by the Publicity Commissioner, Government Buildings, Edmonton, Saturday April 28, 1934.

ARBOR DAY

Alberta's Arbor Day has been fixed this year for Monday, May 7th.

MANY VISITORS TO ALBERTA PARKS

More than 249,000 visitors registered at the seven national parks within Alberta during the year from March 31, 1932 to March 31, 1933, according to the report of the Dominion Parks Commissioner just issued. Of these over 139,000 registered at Banff park, 39,000 at Elk Island Park east of Edmonton, 11,000 at Jasper, 35,000 at Waterton Lakes and 12,000 at

today, it practically amounts to that, doesn't it? What I mean is that fear of losing a job will cause most men to submit to an inordinate degree of control over their way and manner of life."

W. "Yes, you are quite right but I take it that you do not agree that our industrial and productive system exists chiefly for this purpose?"

J. "Decidedly no."

W. "Well, we are clear then that economic activity is simply a functional activity and that, in the words of Douglas 'the end of man, while unknown is something towards which most rapid progress is made by the free expansion of individuality, and that therefore economic activity is most easily and rapidly supplied by economic wants without encroaching on other functional activities.'"

Wainwright Buffalo Park.

COAL OUTPUT FOR FEB.

Total output of coal in the province for February was 362,870 tons a decrease of 185,476 tons from February of 1933.

NURSERIES AT JAIL FARMS

Small nurseries which will in future be supply centres for certain distribution of small trees for farmers in rural districts, have been established this spring at the two provincial jails at Fort Saskatchewan and Lethbridge. Seedlings are now being sent to these institutions and to the Ponoka mental hospital from the central provincial nurseries at Oliver, near Edmonton. The grounds at these institutions will be utilized for development of these seedlings under proper supervision, and in a couple of years, or so trees should be available for distribution for beautifying of farms, school grounds, etc.

HOMESTEAD GRANTS

Total homesteads filed upon in the province during 1933 were 3,580, of which 929 were issued to women. The total shows a slight decrease from 1932.

ALTA. HOG MARKETINGS

Alberta marketed a total of 1,032,169 hogs in 1933, of which 7.92 per cent, graded selects, and 32.57 graded basons. Alberta's total marketings were 32 per cent. of Canada's marketings, this province being second only to Ontario in the number marketed. Improvement in quality is being noted in the Alberta hogs, the percentage of selects marketed for the first two months of 1934 being 9.78 and the percentage of basons being 35.69 per cent.

JUNIOR FARM CLUBS

Junior farm clubs in the province will be more numerous than ever this year, the demand for this class of agricultural extension work having grown tremendously in the past few years. There will be over 50 wheat clubs, an increase of 45 from last year, and in all about 110 seed grain clubs, and about 100 live stock clubs of which about 70 will be swine clubs.

LIVE STOCK PRODUCERS

DEMAND COMMISSION

A commission of investigation on all phases of processing and marketing of live stock has been demanded by the live stock producers of the province in a statement presented to the Stevens committee of investigation now in session at Ottawa, Hon. Geo. Hoadley, Minister of Agriculture, presenting the statement. The live stock producers emphasized that the live stock industry of Alberta was in an extremely serious state, and its rejuvenation depended upon four main points, the stabilization of prices paid producers, the securing of a larger share of the consumers dollar for the producer, the lowering of transportation and marketing costs, and the widening of markets.

T. B. DEATHS DECREASE

Deaths from tuberculosis in Alberta are on the decrease, and the province is now third lowest in Canada in this respect, the rate being about 53 deaths per 100,000 of population.

GOOD PRICES FOR HORSES

Horses are once more in keen demand throughout the west, and recent horse sales in Alberta realized good prices. At Medicine Hat in March, prices ranged from \$40 to \$117.50 for individuals and to \$180 for team. At Lacombe sale, prices averaged \$68 head for over 200 horses sold, the top price paid being \$152.50 for a dividend and \$300 for team.

REGAINED APPETITE AND WEIGHT WITH KELLOGG'S ALL-BRAN

Cereal Relieved His Constipation

If you are a sufferer from headaches, loss of appetite and energy, sleeplessness, or any other of the frequent effects of constipation, read this enthusiastic letter from Mr. McIntyre:

"For a long time my system was not in very good working order. But since eating Kellogg's ALL-BRAN, I have regained my appetite and my lost weight. And my system is in good working order. Kellogg's ALL-BRAN sure does the trick." Mr. J. A. McIntyre (address furnished upon request).

Tests show Kellogg's ALL-BRAN provides the "bulk" needed to relieve ordinary constipation. It also contains vitamin B and iron for the blood.

You'll enjoy this delicious and healthful ready-to-eat cereal. Serve it with milk or cream—or use often in cooking.

Just eat two tablespoons daily. Chronic cases, with each meal. If not relieved this way, see your doctor.

Kellogg's ALL-BRAN is all bran with only necessary flavoring added. It contains much more needed "bulk" than part-bran products. Made by Kellogg in London, Ont.

Early gardeners have Sweet peas up an inch or so, and promise of some early blooms on these plants.

The Skin of Youth At Any Age

Feed the skin and tissues beneath with rich, emollient Melba Tissue Cream. It supplies, as does nothing else, the nourishment needed by every skin past the first blush of youth.

55c

Melba Tissue Cream penetrates. It prevents lines and wrinkles, counteracts ageing and drying effects of exposure and, used as a massage, is unmatched in correcting sagging lines. Use it daily.

Here and There

A. C. Leighton, R.B.A., president of the Government Art College at Calgary, will again hold his summer art school for selected art students from the province of Alberta at the Kananaskis Dude Ranch near Banff, Alta. Mr. Leighton, who is a grand nephew of the late Lord Leighton, president of the British Academy from 1878 to 1896, has been painting for years at Banff and through the Canadian Rockies. He is also head of the Institute of Technology and Art in connection with the University of Alberta. The Kananaskis Dude Ranch operated by Mrs. Bill Brewster, is well known throughout Canada and the United States, and is surrounded by the most magnificent of Canadian Rocky Mountain scenery.

Governor Frank Murphy, of the Philippine Islands, was the guest of Commodore R. G. Latta, of the Canadian Pacific liner Empress of Britain, at Manila on March 15. Governor Murphy inspected the liner, which is engaged on her annual Round the World cruise, and wished Commodore Latta and his ship many happy returns to Manila.

Captain Cyril D. Neroutsos, for many years Manager of the British Columbia Coast Boat Steamship service of the Canadian Pacific Railway, relinquishes his duties on April 1st under the provisions of the Company's retirement regulations. He is succeeded by Captain R. W. McMurray, formerly Marine Superintendent at Vancouver.

Three cruises to the Norwegian fjords and the Land of the Midnight Sun will be made by the Empress of Australia this summer. The first cruise, of 14 days, leaves Southampton June 29, the second from London July 11, for a 19 day trip as far north as Hammerfest, North Cape and Spitzbergen, and the third from Limerick, 12 days, to the fjords and Oslo and Copenhagen. Connecting sailings from Canada for the three cruises are the Empress of Australia from Quebec June 21, the Duchess of Atholl from Montreal July 6, and the Duchess of York from Montreal July 20.

Your favorite picture stars, from Greta Garbo to Betty Boop, will be seen as well as heard aboard the "Duchess" liners, as well as the "Empresses" of the Canadian Pacific this summer. The Duchess of Bedford and Duchess of York are already equipped with talking picture machines and the Duchess of Atholl and Duchess of Richmond will have them for their first voyage this summer. The Empress of Britain and Empress of Australia have been showing talking for some time now.

The Easter holidays, commencing March 29 and extending to April 3rd, offer an exceptional opportunity for travel. The Canadian Pacific Railway is making generous fare concessions and inducements are that extensive travel programmes will be carried out by excursionists and visitors to the Dominion.

A large party of Holy Year pilgrims from the Maritime Provinces sailed from Halifax recently in the Canadian Pacific liner Montclare. On Easter Eve they will be received in audience by the Pope. They will visit London, Paris, Milan, Assisi and other cities in Europe before returning to Canada at the end of April.

Saskatchewan had snowstorms over the week-end which added needful moisture to the already well conditioned seed bed.

Talking about "close" relations, if they get any closer we may as well not have any, for all we can get out of them, says the "devil".

Water was turned into the town ditches on Wednesday, and some of them not being cleaned out yet made irrigation of some spots an established fact, whether desired or not.

The rain storm Monday night was very welcome, but it stopped too soon to suit us, as a good soaking rain right now would certainly be beneficial and welcome to all.

Ralph Bros. have unloaded several cars of building supplies for the Raymond Mercantile during the past week, and more are coming says George.

The Second Ward Gleaners are continuing their work through the summer and the next weeks meeting will be held at the home of Mrs. J. W. Evans Tuesday night at 8 p.m. when the subject will be Interior Decorating and work on their book.

Miss Vivian Card returned home Sunday last after a month's visit with relatives and friends at Salt Lake, Portland, Oregon, and intermediate points. She met her brother Boothe, in Salt Lake City, returning from his mission to France.

ADVICE ON COUCH GRASS ERADICATION IS NOW AVAILABLE

Northwest Grain Dealers Finance Scientific study of control of this weed

Scientific methods for control and eradication of Couch Grass, a weed which is spreading over Western Canada, is made in a pamphlet prepared by Dr. G. P. McRostie, Professor of Agronomy and W. Tildesley B.S.A. Assistant on weed research, of Agricultural College of Manitoba University, on behalf of the Northwest Grain Dealers' Association. Line levator companies operating throughout the Prairie Provinces have financed scientific studies of the weed problem which has been under way for the past three years. The results of these investigations have now been published in pamphlet form. The pamphlets are being distributed free at all line country elevators.

Couch Grass was introduced in Western Canada through small lots of seed sent out to farmers in this country from friends in Europe during the latter part of the last century, and before proper inspection facilities were established on seeds imported into Canada. The Chief Analyst of the Dominion Seed Branch at Winnipeg has found that approximately one-half of the Brome Grass seed sent to the Seed Branch for inspection contains Couch Grass.

The pamphlet dealing with Couch Grass outlines methods for the control and eradication of this weed in a manner that the ordinary layman can easily read and follow. Any farmer troubled with Couch Grass in his fields should obtain a copy. It is also particularly valuable and informative to farmers who wish to keep their fields free from this weed.

B. A. Kerosene is as cheap as any mixture and better than most. D. A. Watson.

Mrs. A. W. Kirkham, Constituency Convener of the W.I. and Mesdames Thes. Allan and Milford Allred visited the W.I. of United Prairie Thursday afternoon in their regular meeting.

By winning three out of four the Vancouver "Province" won the Basketball title of the Dominion and are bringing the silverware home with them. Congratulations to Vancouver.

If we printed all the free advertising that comes to our desk we would have to enlarge the size of the paper to care for it, but what would we live on?

The local Golf Club members are busy now selling tickets for a draw on a set of Golf clubs donated to the Club by Teddy Wagstaff. The sale and prize is attracting considerable attention.

These showers will hasten germination of weeds and seeds and the hoe will be the popular implement of warfare for the next few weeks. Garden planting will be rushed to completion now.

S. H. Clarke, of the Fish and Game Department of the Province showed two or three reels of wild life pictures following the circus Friday night. It is too bad Mr. Clark could not come to Raymond and give his lecture and show the entire set of films to the children, and educate them to the protection of useful wild life.

A miscellaneous shower was held at the Cecil Finch home Tuesday night in honor of Miss Ella McPhee, a bride of recent date, at which 58 friends were present, who all enjoyed the evening, and contributed to the many useful and beautiful gifts received by the honored guest. The shower was sponsored by Mrs. Ruth Finch, who was assisted by Mrs. Ada O'Brien and Mrs. Bob Park. Space forbids listing the names of all those who were present.
